Value your data!

Move your data!

Analyze your data!

Tearing down silos with DR*Net* ®/Unified

Richard K Buckle

Marketing Consultant to NTI

We are awash in data …

**The new playbook for disruptive times:
Awash in data but lacking in connectivity and insight.
Unconnected pools of data cannot continue.**

Antonio Neri, HPE CEO
HPE Discover 2020

... and we need to value our data!

To derive value you need to take action

Dave Packard who famously said, "to stay static is to lose ground"

The only thing that happens if
you wait,
is that you get older

Mario Andretti

Move that data …

Every time data is moved it creates challenges:

How does IT manage data-everywhere scenarios?

Gartner as reported in Network World, Oct 21, 2019

... else it's wasted!

Enterprises need to be more data-first in all that they do …

… but data is a wasted asset if you cannot get insight from it.

March 22, 2022 Antonio Neri
introduces new capabilities for GreenLake

Insight? NonStop data is needed ...

It is disastrous if analytics affecting the business is realized without the data from real-time mission-critical applications running on NonStop

... for analysis driving insight!

Data at its freshest can be found on HPE NonStop systems:

We, at NonStop, create data!

Jeff Kyle
HPE VP Data Solutions
ATUG Chapter event, 2019

**Even
UK's High Street
gets the
message!**

Oxford Street
June 2022

... but so many choices!

There's nothing better for forgetting your problems than getting a new one.

Elana Scherr

Capture data via standards

There are many ways to capture data but the most accepted methodology is Change Data Capture (CDC).

Successfully reading log files, audit trails and user tables is the first baby-step into the 21st Century

NTI: Moves the data off NonStop

Combining the best in industry-wide CDC with support for industry standard JDBC, JSON and more…

Leveraging skills honed with replicating data to support data integration, distribution and transformation

Rising to the challenge - Edge to Core

Covering the bases with replicating to the Core, NTI meets the challenge of integration with and distribution to the Edge.

DR*Net*®/Unified for Business Integration

Combining DR*Net* ®/Vision and DR*Net* ®/Open that will readily coexist with installed Business Continuity products bringing to your enterprise data integration, transformation, and distribution:

To any JDBC Databases

- Oracle, MS SQL Server
- My SQL
- IBM DB2
- Sybase and more...

To other Message Queues, BI, DW Consumers with JSON

- Kafka
- Splunk>
- ELK
- Hadoop and more...

**With no requirements to activate DR*Net*®/Core**

Entering the world of Kafka ...

Entering the world of Kafka ...

Data to be meaningful, operational metadata needs to move

Kafka, a time series database, supports visualization with Grafana

... eased with JSON

This language-independent, self-describing data format has diverse uses in electronic data interchange.

JSON is obviously "the data format" for the internet and JSON streaming is "the future for Ingesting Data".

Unlock the value of data on NonStop

Tear down those silos

Value your data!
Move your data!
Analyze your data!

For NonStop recognising that data
needs to be moved is a
big step forward …

Join enterprise hybrid IT

Its time to share the data created on NonStop

We have users
We have products
We have vendors

And we have community

A new Connect Tech Forum …

Business Integration and Analysis (BI&A)

NonStop customers have witnessed the arrival of many tools and utilities with the sole purpose of better integration of NonStop with its peers.

What's needed today?

A venue where information can be exchanged and where solutions addressing integration and analysis can be communicated.

The Connection

A JOURNAL FOR THE HPE NONSTOP BUSINESS TECHNOLOGY COMMUNITY

SPECIAL ANNOUNCEMENT: Connect Tech Forum: Business Integration & Analysis

🕐 March 30, 2022   💬 0

Business Integration & Analysis A CONNECT TECH FORUM

Value your data!
Move your data!
Analyze your data!   JOIN TODAY

... welcome to BI&A

*"**This BI&A forum is intended to promote 'Data Value Thinking' for data born on NonStop**. Our sole intent is to impart perspective and to augment the critical thinking of participants."*

NTI Global Director Worldwide Sales, Tim Dunne.

*"Data integration requires not only great technology it needs communities such as available with NonStop where amazing talents can join forces to overcome the roadblocks of digital transformation, **so what better place to start than a Connect hosted forum, dedicated to help you get the best value of your NonStop data and more!**"*

HPE NonStop Product Manager, Roland Lemoine

An opportunity for conversations ...

"a little dicey, but it's all on the back-end so customers will never know the difference...right?"

An infrastructure first approach is a broken approach that ends up with unnecessary costs, tooling bloat, and major interoperability problems.

Teams need to focus on understanding the business problems they face … coming up with measurable goals and matching their data stack investment to the business value
they want to create.

Ethan Aaron

CEO and founder, Portable, Inc.

... participate and share!

A place for unity and pursuit of goals; creating greater business insight

BI&A is **a forum to be used to communicate** between multiple groups of people by which they can exchange their thoughts and knowledge.

Engage and keep on coming back …

A HPE NonStop initiative but open to all HPE systems and platforms especially those that perform data analysis

Your destination for communicating:
Webinars
Meet-Up (Major HPE events)
Roadshows
Socials
… and more

... for all your information on BI&A

As the industry continues
to evolve ...

Your best venue for updates from all members of the Connect Community
